Hi Beth:

I have a call in to Ed Garvey since Eugenia has requested data specifically related to his analyses. He is in the NNJ office today, so I know I will be able to reach him this afternoon (he is currently in a meeting on the Passaic River CSM Update) -- we are also attending the Newark Bay coordination meeting together tomorrow am.

Len

Len -- who is this assigned to (i.e. - who should Eugenia follow up w/ - or expect to hear from about when this will occur) -- thanks -

Subject: Fw: I'd like to request some databases and data from MPI

Is there someone who can help Eugenia get the data she is requesting below? I would prefer if someone could help her download the data from PREmis, since that's what we created PREmis for, but if it would be easier to just send her the data, I guess what's easier is better.

Alice/Beth,  
I would like to do some data analysis, statistics and calculations with some of our historic and current data. I'd like to obtain the following databases from MPI (I tried PREMIS but wasn't sure what to download):  
- Historic core samples

- Historic bathymetric data
- Low-res and high-res cores (Have the high res been analyzed? If not, is there a proposal for these analysis?)
- Data that Ed Garvey used for his mass balance calculations, and his calculations (in spreadsheets, mathcad files or whatever package he used)
- I'd also like to get some groundwater data. Does MPI have any? I think we'll probably have to get this through DEP -we can discuss

Let me know if either you would request this to MPI or whether I can do this directly or if you want to set up a call with them. I gotta start crunching data soon!
